

Meeting Report
ISO TC 188/ WG 29
Espoo, Finland
June 26, 2013

Technical Committee 188 – Working Group 29, Galley stoves

1. The transitional period for introduction of new standards in ISO is moving from 6 to 12 months; industry is asking for a 12-18 month transitional period.

ISO 14895, Liquid – fuelled galley stoves and heating appliances

1. Excluded the marking requirement for non-fire resistant fuel hose following ISO 8469, and excluded UV resistance requirements if the hose is used internally (in the boat).
2. Added fuel shut off requirements for heating appliances to prevent siphoning out of the tank.
3. The WG is considering two separate proposals for heating appliance design and construction. One proposal was from stringent auto heaters standards, the other from a marine heater manufacturer. Comparison of proposals will be subject of a future webinar.
4. A duplicate label is required.
5. Next Action: Next meeting of the WG will be held at METS 2013.
